Language

English B1-B2

Polish A2

Russian C1

Ukrainian Native

Svyatoslav Vermiy

Junior Developer

Having a lot of non-commercial experience in low-level languages like C++ and Rust, I am interested in web technologies. I am actively learning the JavaScript and TypeScript language and the Node.js platform along with the React library. In my spare time I mostly look for literature, like books or some courses, and try to improve my English skills. I am currently looking for an internship or Junior Backend Developer position.

Experience

2023 December

Freelance project l 2m

Trainee Rust Developer

Work in a team of 3 people on a desktop application in Rust using egui library under the supervision of a developer with 15 years of experience. The main tasks are implementation of the program interface, connection of third-party libraries and development of simple logic.

2022 - 2023

Uvocorp l 1y

Freelance

One of the main platforms for freelancing, most of the clients are students, and most of the orders were related to writing student research projects, laboratory works, other assignments.

Technologies and tools

Backend

- JavaScript, TypeScript
- Node.js, Express.js
- Rust
- C++
- PostgreSQL, MongoDB

Frontend

- React.js
- HTML, SCSS

Tools

- Git
- Docker
- VS Code, Nvim
- Linux / Windows
- Qt

Projects

File Archiver

Project as part of the course work, implemented using C++ and Qt framework is used to compress any files, in order to reduce the size and convenient storage.
